

I appreciate the effort you have done to help the deaf community improve with the society especially VRS (Video Relay Service). I have read that you are planning to cut funds or somewhat in the like. I wish to express my opinion, I think this is inane. I was so excited when I first heard of VRS service. I was able to fluently communicate with people who are not deaf and it is really a blessing to have. This was made possible that the TTY cannot do. You help made that possible and I hope you will continue the money supply you have been giving VRS. I only ask you to reconsider what you all are attempting to do and think how it would be a blessing to you if you were in our shoes. Thank you for your time, I know it is precious.
